Spirit Wood
Dye

Spirit Wood Dye

For colouring dense hardwoods such as mahogany and oak.

Purpose

Liberon Spirit Wood Dye is ideal for use on hardwood and for furniture restoration and is a traditional dye which penetrates deep into the wood. It can be mixed together to obtain intermediate shades.

Performance

- For colouring dense hardwoods such as mahogany and oak
- Ideal for colouring previously finished woods i.e. for antique restoration
- Easy to apply
- All colours are intermixable
- Usage : Interior
- New ethanol based formula

How to use

Preparation

Ensure the surface is free from existing finishes; wax, oil or grease. Sand thoroughly to a smooth finish and remove the dust.

Application

Shake well before use. If more than one tin of dye is required to complete the work mix the tins together to ensure a uniform colour. Apply one liberal coat of Spirit Wood Dye with a brush or cloth, working with the grain wherever possible, allow the stain to penetrate, then remove the excess with a clean cotton cloth. For a stronger colour, apply a second coat after 4 hours. When dry, Liberon Spirit Wood Dye may be finished with a water-based varnish, wax, oil or French Polish.

Important

Always test product on a spare surface or inconspicuous area for colour, compatibility and end result. Different types of wood produce different results. The colour bar may not be a true representation of the actual colour.

Precautions

- Make sure you have sufficient dye to finish the work. If more than one tin is required, mix the contents together in a clean container to ensure a uniform colour.
- Do not mix spirit based dyes with water based dyes
- Do not mix with white spirit based dyes
- Caution must be taken when using French polish and Shellac base sealers as over brushing may remove the stain.
- Application of a second coat may lift the first coat.
- Caution must be taken when using oil based finishes over Liberon Spirit Wood Dye. Keep brush strokes to a minimum as over brushing may lift out the colour.

Coverage

1 L = 8-16 m²

Finish

Ebony, Georgian Mahogany, Light Oak, Medium Oak, Dark Oak, Antique Pine, Teak and Walnut.

Pack size

250 ml, 1 L, 5 L

Drying time

Min 6 hours
